

ENVIRONMENTAL SERVICE SOLUTIONS

CAPABILITY STATEMENT

COMPANY OVERVIEW

Dunamis Clean Energy Partners (DCEP) is a woman-owned, MBE-certified provider of environmental service solutions – including janitorial and industrial cleaning – for the utility, manufacturing, government, healthcare, and industrial sectors. Founded in 2012, DCEP has spent more than seven years as a Tier 1 janitorial services provider to DTE Energy (NYSE: DTE), Michigan’s largest utility – currently managing a workforce of over 120 employees delivering janitorial and light industrial cleaning services at power generation plants and facilities across the state of Michigan.

DCEP is led by an executive and management team with more than 100 years of combined leadership experience, backing every engagement with the discipline, accountability, and operational rigor that utility, industrial, and institutional clients require.

KEY DIFFERENTIATORS

- 100% employee workforce – no temporary or subcontracted labor. Every team member completes rigorous on-site and in-classroom training to master our equipment and cleaning protocols before stepping onto a client site.
- Proven at scale in critical infrastructure – over 120 employees currently deployed managing janitorial and industrial cleaning operations at utility power plants across Michigan.
- Safety-first culture – an EMR of 0.65 and a two-plus-year record free of safety incidents reflect training and accountability built into daily operations, not a one-time initiative.
- Responsive and reliable – emergency service available any time, with schedules built around client operations, not the other way around.
- Scalable to any facility – from single commercial spaces to multi-site industrial and utility campuses, cleaned to the highest standard using industry best practices and state-of-the-art equipment.

SAFETY FIRST. ALWAYS.

**EMR (Experience
Modification Rate) of
0.65 –**

well below the industry
benchmark of 1.0

**Two-plus consecutive
years of operations
across our utility power
plant sites**

without a single
recordable safety incident

**Full OSHA
compliance**

on every site,
every shift

**Ongoing on-site
and in-classroom
safety training**

for all field
personnel
