

Dunamis Clean Energy Partners: Helping Utility Company Commercial & Industrial Customers **Save 30%** on Energy Costs

DUNAMIS ENERGY MANAGEMENT SERVICES

Utilizing the expertise of our certified energy managers, we specialize in creating energy and operational cost savings through the implementation of turn-key energy efficiency and renewable energy solutions along with energy management best practices for our utility customers. We are an experienced utility trade ally and currently a tier 1 supplier of energy management services and Certified Energy Managers to commercial/industrial customers of a large IOU.

Our Core Competencies:

- Establish energy baseline from tracking utility data
- Identify low-cost facility measures to implement
- Identify energy saving capital improvement projects
- Energy-Efficiency/Renewable Energy/Energy Storage Integration
- EV Charging integration and energy management
- Submit rebate applications for energy facility & capital projects
- LEED Certification / ENERGY STAR for Business

Clients:

We investigate and quantify potential energy savings in:

- Lighting systems and lighting controls
- HVAC systems and controls
- Compressed Air Systems
- Electric motors, drives and pumps
- Building envelope
- Process equipment and systems
- Heat recovery, VFDs, PF correction
- Renewable energy generation

Energy Saving Projects:

- LED & controls upgrades
- Heat pump installation
- Boiler & chiller tune-ups
- Optimized plant sequencing
- Cool roof installation
- Window replacement
- Retro-Commissioning

LEED Project Example:

- Higginbotham Garden Apartments
- Pursuing LEED O+M Silver certification
- Adaptive reuse of a vacant school building being converted into apartments
- Listed on the National Historic Registry

30% average savings across energy reduction projects

Energy Management Services:

- Certified Energy Managers and Auditors (CEM, CEA), Professional Engineers (PE) and Project Management Professionals (PMP)
- LEED BD, LEED O&M, Green Rater
- Provide demand side energy conservation program management to large commercial and industrial customers
- Identify and analyze energy conservation measures and opportunities, with the objective of optimizing energy utilization
- Provide energy waste reduction technical support for designated customers
- Understand existing and new products, services, and technologies to optimize energy usage in a cost-effective manner
- Develop and implement energy management programs and awareness activities

Our professional staff of Certified Energy Managers, auditors and engineers provide comprehensive ASHRAE level energy audits and engineering services that:

1. Reduce operating expenses and increase profit
2. Prioritize recommended measures according to customer criteria
3. Increase value of facility

Case Study: DTE Energy (NYSE: DTE)

Dunamis Clean Energy Partners, LLC has been a Tier 1 supplier of Energy Managers to DTE Energy for the past five years as part of a commercialized program aimed at improving energy efficiency and operations for DTE's largest commercial and industrial customers. The successful execution of our pilot program resulted in substantial cost savings, exceeding all expectations. As a result, DTE will be commercializing our pilot program nationwide beginning next year.
